Hunt's Coarse, Low-Shrinkage Body (From Raku to Cone 9)

Perlite	1 part by vol. (13% by wt.)
Any Stoneware Body (dry)	1 part by vol. (87% by wt.)

*This recipe, and those containing still more perlite, should exhibit extreme resistance to thermal shock, will appear quite pebbly, and will be difficult or impossible to throw. (Volume measurements are approximate because clays tend to pack during shipping and handling, rendering more clay per volume the greater the packing.)

Hunt's Coarse, Throwable, Low-Shrinkage Body (Cone 8-9)

Perlite	1 part by vol. (7% by wt.)
Any Stoneware Body (dry)	2 parts by vol. (93% by wt.)
